SUCCESS STORY OF

Mr. Rajan Oram, Age-20, Sex- Male , Status- OH

- Home situation:
- My name is Rajan, I am from Dumber Para, Sambalpur. I am 20 years old boy & a student of JIPMER (Jawaharlal Institute of Post graduate Medical Education & Research) Pondicherry. I lost my father 5 years back. After my father's death my family suffered a lot. I have an elder brother & a younger sister, my brother is married already. My mother is a beady worker. Whatever she earns is not sufficient to fulfil our daily requirements.
- Interests:
- A person with disability is not any less capable or any less smart than a person without a disability. I believe that working hard is the key to success. Previous year I qualified in engineering entrance but my aim is to be in the medical field. At last my hard working drew me to achieve my goal. This year 2015 I was succeeded in All India Medical Entrance examination. Recently I got an admission in Jawaharlal Institute of Post graduate Management and Education of Research. I offered my sincere thanks to almighty God. I am grateful for all the opportunities and support given by the JMJ CCC.
- Personal Characteristics: All human beings are created by almighty God. He made us the way he wanted. So, for that matter, we are different from each other with respect to our qualities, characteristics and behaviour. My family members are always encouraging me to study well. Each time a little smile would dance at the corners of my mum's mouth as she whispered; that is my angel.
- Social circumstances:
- Everybody in my community knew each other. Some are cooperate with me very well but some are commented and denied me for any social activities.
- First contact:
- JMJ CCC staff heard about me and visited our house. They were explained about the SLF program in their centre. My family members agreed their suggestion and I was enrolled in this program. Since three years onward I am getting educational assistance from the centre. I feel proud of everyone who supported me and helped me to move forward, and I am grateful to them. I look forward many
- adventures in life and hope that I will find happiness and success in helping other people. My family is grateful to be recipients of support from the SLF program.

Child Empowerment Program

Child Empowerment Program

We are taking care of 52 children and 4 more added to them we are working in two districts namely in Bollinger district and sambalpur district.
